ProBox Series

Future-proof video surveillance solution for recording and viewing live images from up to 50 cameras

Gear up for the future with the SeeTec ProBox series: your SeeTec ProBox installation offers cutting-edge IP video technology such as megapixel/HD resolution or worldwide remote access with SeeTec Anywhere.

The SeeTec ProBox series does not only contain usual video surveillance features such as live view, image recording (standard and alarm recording) and control of up to 50 cameras. Furthermore, it provides all the benefits of a software solution using IT standards: Install the SeeTec ProBox video management software on any PC in your network and experience the power of a professional next-generation video surveillance tool.

Image Recording

- ▶ Standard and alarm recording
- ▶ User-defined recording period
- ▶ Alarm and event list
- ▶ Recording on standard IT hardware
- ▶ Access to recordings from surveillance or archive mode
- ▶ Support of all current video standards such as MJPEG, MPEG4, H.264

PTZ Control

- ▶ Configuration of preset positions for any PTZ camera
- ▶ Joystick control
- ▶ Preferred PTZ control
- ▶ PTZ control via software panel or point and click
